?????? Now using visual studio 2015 professional key. I have existing project that contains .NET framework 4.6.1. After I install visual studio 2015 professional, it gives below error on build. Severity Code Description Project File Line Suppression State Error The referenced assembly "System.Runtime, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b03f5f7f11d50a3a" could not be resolved because it has a dependency on "System.Runtime.WindowsRuntime, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b03f5f7f11d50a3a" which is not in the currently targeted framework. C:\Windows\Microsoft.NET\Framework\v4.0.30319\clr.dll 1 A: This is caused by the .NET 4.0 framework not being compatible with .NET 4.6 (same error is currently affecting people with VS2015 RC as well, but it's fixed in RC2). To solve this, use the Visual Studio Command Prompt to execute the following command: C:\Windows\Microsoft.NET\Framework\v4.0.30319\InstallUtil.exe v4.6 The result will show you the locations where you need to copy the missing .NET Framework 4.6 dll's to get this to work. I had the same issue and I solved it by simply downloading .net 4.6.1 from Microsoft. This solved the problem for me. This invention relates to a process for heat treating ferritic-martensitic alloys. More specifically, the invention relates to a method for heat treating ferritic-martensitic stainless steels in a vacuum. Ferritic-martensitic stainless steels have been used in a number of different industries, such as the oil and gas, petrochemical, and transportation industries, because of their excellent corrosion and wear resistance properties. However, the use of such steels has been limited because many of these steels are difficult to fabricate into useful components. In particular, the fabrication of large components such as gears, screws, or deep 82157476af
